

COMPRESSOR TEAR DOWN SEMINAR

Presented by Mark Walczyk of Copeland

Thursday, February 21st, 2019

Dinner, 4:30 to 5pm

Seminar, 5 to 7:30pm

Crescent's Arnold Branch

1500 Lonedell Industrial Ct. | Arnold, MO 63010 | 636-296-2778

Mark Walczyk of Copeland (30+ years experience) will discuss the five most common mechanical failure modes on semi-hermetic compressors, i.e., overheating, loss of oil failures, refrigerant floodback, flooded starts and slugging. Detailed cause and effect analysis. Compressor tear downs in small groups to evaluate failures with recommendations for corrective actions. Also, overview and diagnostic information on Copeland's new CoreSense Protection module.

Class is FREE / Space is limited to 25
