

Our new online store lets you buy the quality parts and equipment you need anytime, anywhere! If you're not already familiar with the store, here's how it works.

1 Go to the online store and log in

You can find the store by going to <https://store.crescentparts.com> or visiting our website (www.crescentparts.com) and clicking the blue Online Store button on the top right.

If you don't already have a log in, select the Click Here To Register button and follow the instructions.

Make sure to keep your username and password safe.

2 Select the products you want

Select the type of product you're looking for from the gray main menu or type the product into the search bar on the top right.

You will see a list of products that fit what you selected or searched for. Scroll through your options and use the menu on the left to further narrow your search.

Each product's vendor, picture, part number, manufacturing number, description and price will be listed for your convenience. For product availability, look to the right under Stock and find the blue link that says Check. Hover your cursor over Check.

When you find the product you want, select the quantity you'd like and click the blue Add button on the right to add it to your cart.

3 Review your order and purchase

When you're ready, click the gray shopping cart icon on the top right, review your order, and select the blue Checkout button at the bottom.

If this is a regular purchase, consider selecting the blue Save as Kit button for easy re-ordering later.

Select a PO number, choose how you want your product(s) shipped to you (UPS, Will Call, UPS Next Day, or Delivery), and include any relevant notes.

A confirmation email will be sent to the email address connected to your account shortly after purchase.

Still have questions? Ask your counter salesperson for assistance.
