

Food preservation just got a lot more consistent.

Evaporator Efficiency

This precision food preservation device increases product life and reduces food spoilage.

Applications

- walk-in cooler
- walk-in freezers
- meat prep rooms
- refrigerated warehouses
- closed door display cases
- blast freezers

Features & Benefits

- Defrosts only when needed — reduces defrost up to 87%
- Replaces time clock, room thermostat, defrost termination device
- Provides up to 20% system energy savings
- Average payback occurs in less than 24 months
- Audible/visual alarms, as well as alarm notifications by text or email
- Enables remote monitoring & control
- Eliminates ice formation on floors and ceilings associated with defrost cycles
- Data logging by 17 parameters
- Re-humidification of conditioned space to increase product shelf life
- Eliminates excessive temperatures found with conventional defrost cycles
